

Bidder Information Session

April 16, 2026

**FirstEnergy Ohio Utilities'
Competitive Bidding Process for
SSO Supply Procurement**

Auction Date: June 9, 2026
Delivery Period: June 1, 2027 – May 31, 2029

Introduction

Welcome to this bidder information session for FirstEnergy Ohio Utilities' Competitive Bidding Process (CBP)

- FirstEnergy Ohio Utilities: The Illuminating Company, The Toledo Edison Company, and Ohio Edison Company (“Companies” or “FEOU”)
- CBP is designed to procure full requirements service for SSO Customers of the Companies ("Standard Service Offer Load" or "SSO Load")
 - Includes load not being served by a Competitive Retail Electric Service ("CRES") Supplier
 - Excludes Percentage of Income Payment Plan (“PIPP”) Customers
- Winning bidders will assume responsibilities of a PJM Load Serving Entity (“LSE”), however renewable energy requirements will be procured by, and be the responsibility of, the Companies
- Auction date is June 9, 2026
- Delivery period is June 1, 2027 through May 31, 2029

Presentation is being made by representatives from

- Charles River Associates, the independent Auction Manager
- This presentation will be posted to the Auction Information Website

Introduction

Questions

We will be collecting questions during the presentation.

Please send all questions via email to FEOUAuctionManager@crai.com.

Questions will be answered in the order received and only after the prepared presentation.

Introduction

Disclaimer

The material contained in this presentation is intended to provide only generally descriptive and summary information. The information and material provided on the Auction Information Website and filed with the Commission are controlling. Any conflict between the information conveyed during this bidder information session, and what is provided on the Auction Information Website, is unintentional.

Certain information may be subject to modification and approval by the Commission.

Introduction

Background

On May 15, 2024, the PUCO approved the Companies' fifth Electricity Security Plan (ESP-V) for a term of 5 years, including continuation of the SSO auction process with modifications.

FirstEnergy's Application was approved, modified by Staff's recommendations, by an Order issued on May 15, 2024.

On June 14, 2024, FirstEnergy filed an Application for Rehearing, still pending in front of the Commission. Among other things, the Companies are asking the Commission's approval to Truncate the ESP-V term to three years

Q&As

Communications

Central source of information is the Auction Information Website:
www.firstenergyCBP.com

- Documents – CBP participation documents, load data, etc.
- Calendar
- Results – from previous CBP auctions
- News
- FAQ
- Ask – submit a question
- About – links to background information
- Registration – register to receive future notifications

Communications Protocols (available on Information Website)

- Promote a fair, open, transparent, objective, and non-discriminatory CBP
- Auction Manager is the communication point for prospective bidders
- Information is distributed and disseminated equally and fairly to all prospective bidders

Product Overview

Full requirements service for SSO Customers of the Companies excludes load being served by a CRES Supplier and load associated with PIPP customers but includes:

- Energy
- Capacity
- Market-based transmission services
- Any other LSE service or other service as may be required by PJM to serve the SSO Load of the Companies except those listed in Section 2.3 of the Master SSO Supply Agreement

Winning bidders will be responsible at their sole cost and expense for:

- Any changes in PJM products and pricing during the contract term
- Any congestion costs incurred to supply its SSO share
- Remaining a member in good standing of PJM

Each SSO Supplier shall be responsible and liable to PJM for the performance of its LSE obligations associated with the provisions of SSO Supply

Product Overview

(continued)

SSO Suppliers will be obligated under the Master SSO Supply Agreement to

- Deliver full requirements service of the slice of system of the Companies for purposes of meeting SSO Load
- Assume specified LSE obligations for purposes of PJM settlement

SSO Suppliers will not be obligated to provide

- Distribution services
- Alternative or renewable energy requirements

SSO Load will be divided into identical units called tranches

- Each tranche represents one percent (1%) of the actual hourly energy required for SSO Load for the relevant Delivery Period as well as one percent (1%) of the PJM capacity requirement for the relevant Delivery Period
- Intent is to procure 100 tranches for each delivery period over multiple CBP auctions

Product Overview

(continued)

Table below shows the tentative, nominal MW quantity associated with the energy obligation and the capacity obligation for each tranche based on historical data of all customers with the exception of PIPP customers.

Number of Tranches Per Delivery Period	Size of Tranche (%)	Energy Obligation		Capacity Obligation	
		Peak Load Share (MW)	MW-Measure of Tranche	Peak Load Share (MW)	MW-Measure of Tranche
100	1%	10,560	106	10,506	105

The energy obligation quantity is not necessarily indicative of the actual energy quantity to be delivered for each tranche because the amount of actual SSO Load during the Delivery Period will depend upon many factors, including but not limited to customers being served by CRES Suppliers and weather conditions

Bidders are responsible for evaluating the uncertainty associated with supplying a wholesale energy tranche which could vary each hour from the nominal maximum hourly energy for the delivery period shown in the table

The capacity obligation estimate associated with the Peak Load Share quantity to be delivered for each tranche also is shown in the table

These values are provided for reference purposes only and may be updated prior to the auction as explained in the Bidding Rules

The Companies do not represent that each tranche will have the loads shown above or any particular MW value – the actual SSO Load during the Delivery Period will depend upon many factors

Product Overview

ESP-IV Procurements Schedule

			2026												2027												2028												2029											
Auction Timing	Tranche Target	Load Cap	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	4	5	6	7	8	9	10	11	12
Summer 2026	16	25							Summer													12 months June 2027 - May 2028																												
	16		24 months June 2027 - May 2029																																															

Product Overview

ESP-IV Procurement Schedule

Capacity Proxy Price (“CPP”)

- PJM is not expected to conduct a base residual auction for the 2028/2029 delivery year before the June 2026 auction.
- The Capacity Proxy Price for 2028/2029 delivery year is set at \$331.38.
- For each Billing Month where a CPP was used, an additional line item on the supplier invoice will show the true-up amount expressed in dollars which is the difference between the Capacity Price actually charged for load served on the day for the Company’s PJM zone and the CPP multiplied by the SSO Supplier Responsibility Share of the Capacity obligation (UCAP) for each day of the Billing Month in question. True-ups will occur in the delivery year where a proxy price was utilized.

Product Overview

Minimum and Maximum Starting Prices

Prior to the auction, the Auction Manager will announce the minimum and maximum starting price range for each auctioned product

- As part of the application process, Qualified Bidders submit indicative offers based on the minimum and maximum starting price which will be used to determine the Bidder's initial eligibility in the auction

The Auction Manager may determine that due to extraordinary events, the minimum starting price or maximum starting price require revision

- If indicative offers have already been received, the Auction Manager will request that the Registered Bidders – or the Qualified Bidders if the Part 2 Application process has not been completed – modify their indicative offer on the basis of the revised minimum starting price and the revised maximum starting price
- Such an event also may require a revision to the schedule for the CBP auction

No later than three (3) business days before bidding starts, the Auction Manager will inform Registered Bidders of the starting price for round 1

Qualification Process

Overview

There will be a Part 1 Application and a Part 2 Application for the June 2026 auction

Part 1 Application: Prospective bidders apply to become Qualified Bidders

- Start Date: Friday, April 17, 2026
- Due Date: Tuesday, May 5, 2026, 12:00 noon ET

Part 2 Application: Each Qualified Bidder provides certifications, its indicative offer, and pre-bid security in order to become a Registered Bidder

- Start Date: Tuesday, May 12, 2026
- Due Date: Thursday, May 28, 2026, 12:00 noon ET

Only Registered Bidders can participate in the bidding

NOTE: Prospective bidders will be able to fill out, submit, and upload their supporting documentation for the Part 1 and Part 2 Applications on-line through the secure Online Application Website. Hardcopies are not required.

Qualification Process

Part 1 Application – Due Tuesday, May 5, 2026, 12:00 noon ET

Submit an application from a person with the power to bind the bidder and agree to:

- Comply with all rules of the auction
- If they become winning bidders, they will execute the Master SSO Supply Agreement with the Companies

Show that they either satisfy the three requirements below, or have no existing impediments to them satisfying all the requirements by the start of the supply period

- Transmission Customer of PJM and have executed the required PJM Agreements
- Have PJM E-Accounts necessary to provide SSO Supply
- PJM Market Participant and a Load Serving Entity in PJM

Agree that if they become winning bidders, they will comply with the creditworthiness requirements set forth in the Master SSO Supply Agreement

Certify that if they qualify to participate, they will not:

- Disclose information regarding the list of Qualified Bidders
- Disclose confidential information about Qualified Bidders obtained during the bidding process
- Substitute another entity in their place
- Transfer their rights to another entity
- Otherwise assign their status as Qualified Bidders to another entity

Qualification Process

Part 1 Application *(continued)*

A prospective bidder that has qualified during the Part 1 Application process becomes a Qualified Bidder

Auction Manager will send a list of all Qualified Bidders to relevant parties that have undertaken to maintain the confidentiality of the list of Qualified Bidders – relevant parties that will receive this list of Qualified Bidders are:

- Each Qualified Bidder
- Other parties as necessary to oversee the proper conduct of the auction, including representatives from the Companies, Commission Staff, and the advisor that Commission Staff has retained for this purpose

All parties receiving a list of Qualified Bidders will be subject to the confidentiality requirements as specified in the Bidding Rules and in the Communications Protocols

Part 1 Applicant also must submit financial information and Draft Pre-Bid Letter of Credit

Prospective bidders will be notified by the Auction Manager no later than three (3) business days after the Part 1 Application Due Date whether they succeeded in becoming a Qualified Bidder

Qualification Process

Part 1 Application (*continued*)

Part 1 Applications can be submitted online

- The Part 1 Application process opens on Friday, April 17, 2026
- The Part 1 Application process closes on Tuesday, May 5, 2026, 12:00 noon ET

Qualification Process

Part 1 Application – New Prospective Bidders

Complete the Account Request Form (see example on next slide) and email it to FEOUAuctionManager@crai.com

Account Request Form is available on Information Website www.firstenergycbp.com on Home page under “Forms”

Proposed changes to credit documents – to be emailed to the Auction Manager – are not considered a change to your Part 1 Application itself (but are due by the Part 1 Application Due Date)

Qualification Process

Part 1 Application – Account Request Form

FirstEnergy Ohio Utilities' Competitive Bidding Process

Account Request Form: Request for Part 1 and Part 2 Application Online Account

With access to an Online Account for the Part 1 Application and Part 2 Application process, a prospective bidder will be able to submit and check the status of their Part 1 Application and Part 2 Application as well as upload supporting documentation.

To open an Online Account please fill in the following information:

Company Name: _____ **Date:** _____
MM/DD/YYYY

Please provide the First Name, Last Name, and E-mail Address for every person that you request to be given access to your online Application. Each person listed below will receive a unique username and password combination that they will be able to use to login to the online application of the Company named above.

	First Name	Last Name	E-mail Address
1.			
2.			
3.			
4.			
5.			
6.			
7.			
8.			
9.			
10.			

Qualification Process

Part 2 Application – Due Thursday, May 28, 2026, 12:00 noon ET

Qualified Bidders from the Part 1 Application process submit a Part 2 Application to become Registered Bidders

The Part 2 Application process opens on Tuesday, May 12, 2026

Due Date: Thursday, May 28, 2026, 12:00 noon ET

In the Part 2 Application, each Qualified Bidder will make a number of certifications regarding associations to ensure that they are participating independently of other Qualified Bidders and to ensure the confidentiality of information regarding the auction

A Qualified Bidder is associated with another Qualified Bidder if the two bidders have ties that could allow them to act in concert or that could prevent them from competing actively against each other

Qualification Process

Part 2 Application *(continued)*

With its Part 2 Application, a Qualified Bidder will be required to submit an indicative offer – two (2) numbers of tranches for each product in the auction – and to post pre-bid security sufficient for this indicative offer

- First number is the number of tranches that the Qualified Bidder is willing to serve at the minimum starting price for each product in the auction
- Second number is the number of tranches that the Qualified Bidder is willing to serve at the maximum starting price for each product in the auction
- At the minimum and the maximum starting price, the number of tranches indicated by the Qualified Bidder cannot exceed the Qualified Bidder's credit-based and/or load tranche caps (described later)

Bidder's initial eligibility

- This is the maximum total number of tranches the Qualified Bidder can bid across all products in round 1 of the auction and it may be subject to a load cap
- Determined by the number of tranches in the Qualified Bidder's indicative offer at the maximum starting prices
- Thus, the indicative offer at the maximum starting prices needs to state the maximum possible number of tranches that the bidder would be ready, willing, and able to serve

Qualified Bidders will be notified by the Auction Manager no later than three (3) business days after the Part 2 Application Due Date whether they succeeded in becoming a Registered Bidder

Credit Provisions

Required Credit and Financial Information

For bidder or bidder's Guarantor:

- **Financial statements** (most recently issued SEC Form 10-K, 10-Q, 8-K)
- **A statement of rulings or judgments** relating to financial status that have had a material impact on financial status
- **A debt rating** from at least one of the following rating agencies: S&P, Fitch, or Moody's (with supporting documentation)
- **Contact information** for the Bidder's/Guarantor's credit representative to answer questions on the documentation provided

Credit Provisions

Credit-Based and Load Tranche Caps

The tranche cap limits the bidder's initial eligibility – i.e., maximum number of tranches the Qualified Bidder is allowed to bid across all products in round 1

Credit-Based tranche cap is based on the credit rating of the Qualified Bidder or its Guarantor – Qualified Bidder or Guarantor must:

- Be rated by at least one of the following rating agencies: Standard & Poor's Rating Services ("S&P"), Moody's Investors Service, Inc. ("Moody's"), or Fitch, Inc. ("Fitch")
- If a Qualified Bidder that is rated below BB- or Ba3 or is not rated by any of the credit agencies, the credit-based tranche cap is 6 tranches

Load cap is a percentage of load aggregated for each product for the auction date

- Load cap is 80 percent
Load cap = 25 tranches (tranche target = 38 tranches)
- No bidder may bid on and win more tranches than the load cap in the auction
- The load cap is enforced by ensuring that each bidder's initial eligibility does not exceed the load cap in an auction
- No two or more associated bidders may bid on and win more tranches than the load cap

Credit Provisions

Pre-Bid Security – 2 Options

1) Use Pre-Bid Letter of Credit

- Part 1: Submit a Draft Pre-Bid Letter of Credit (LOC)
- Part 2: Submit an executed Pre-Bid LOC (\$500,000/tranche)

2) Make a cash deposit

- Part 1: Request Wiring Instructions
- Part 2:
 - Submit cash deposit (\$500,000/tranche)
 - Attach a copy of W9 (tax ID) and a copy of banking information on company's letterhead, signed and dated
 - Provide wiring instructions for returning your cash deposit

Credit Provisions

Master SSO Supply Agreement – Key Elements of Credit Provisions

Security posted during the term of the SSO Delivery Period will depend upon a creditworthiness evaluation

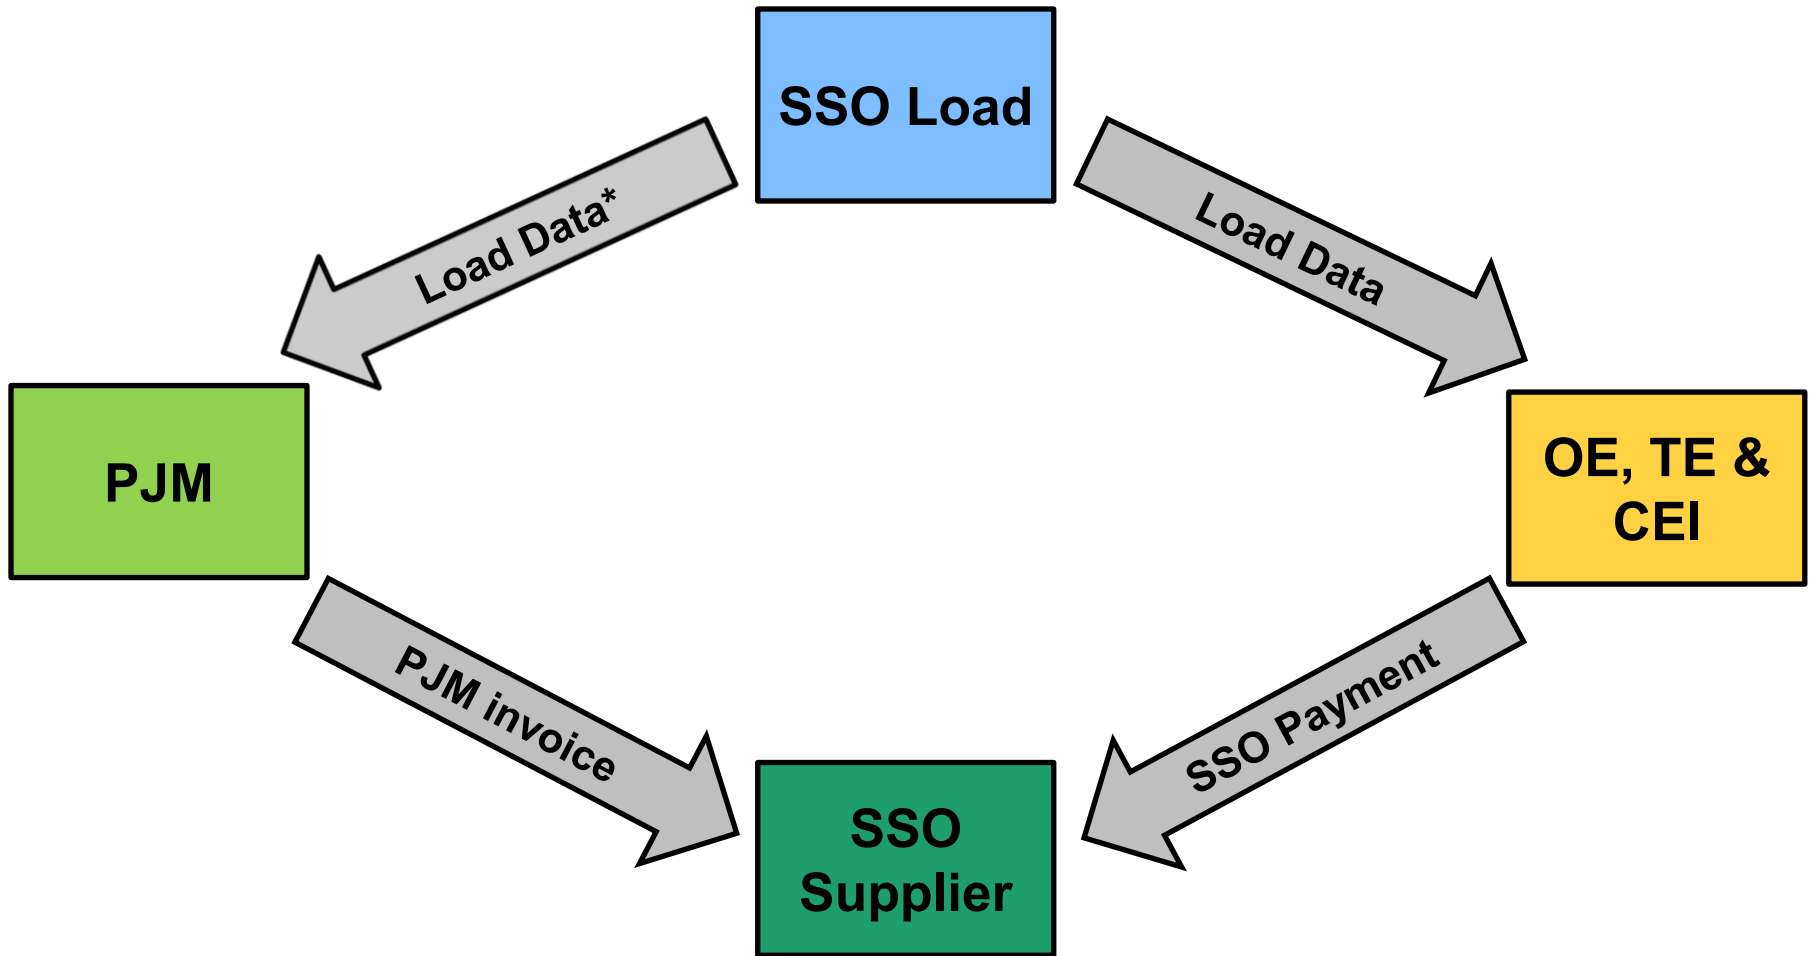

- Unsecured credit may be granted based on the Supplier's (or its Guarantor's) Tangible Net Worth and credit rating (see Section 6.4 of Master SSO Supply Agreement)
- The Companies reserve the right to apply any unsecured credit limits across associated bidders in cases where multiple associated parties seek to participate as independent bidders
- Total Exposure Amount less any unsecured credit (Margin) must be met with cash or Letter of Credit (Appendix D of Master SSO Supply Agreement)
- Margin could be met with either cash or Letter of Credit

Letter of Credit: Appendix D of Master SSO Supply Agreement

Guaranty: Appendix E of Master SSO Supply Agreement

PJM Settlement

Settlement Landscape

* Load data are developed by the Meter Data Coordinator as designated on the Market Participant's application. The Meter Data Coordinator uses the same PJM settlement data to calculate the SSO Invoice as well as to submit the settlement data to PJM.

PJM Settlement

The Role of RTO Operations Settlements at FEOU

Acts as the Meter Data Coordinator for SSO Suppliers

- Submits load data to PJM for generation of invoices
 - Primary and Secondary data
 - Re-Settlement periods as well
- Splits SSO Load by tranches won in Delivery Period

Uses PJM settlement load data to develop the SSO Invoices

- Primary and Secondary data are used for Final Monthly Energy Allocation (FMEA) and Preliminary Monthly Energy Allocation (PMEA)
- Spreadsheet format
- Emailed
- Based on tranches awarded in SSO procurement process

PJM Settlement

The Role of RTO Operations Settlements at FEOU

An SSO Supplier must create a unique PJM “short name” (or subaccount) for Ohio SSO energy obligations*

Also, Billing Line Item Transfers can occur only if a Supplier has created unique short names for Ohio energy obligations. If these line item transfers do not occur, then the SSO Supplier will be assessed charges by PJM that should be the responsibility of the Companies

Please create new PJM short names and then provide the new short name information to the following FirstEnergy personnel:

Maria Locastro mlocastro@firstenergycorp.com

Robert Brown rdbrown@firstenergycorp.com

For RTO settlement questions please contact Robert Brown or Maria Locastro at the emails listed above.

* Retail load suppliers (CRES) also must create a unique short name for Ohio retail energy obligations

ADDITIONAL BILLING STATEMENT INFORMATION:

Bidding Format

Clock Phase - Overview

Multiple-round, multiple-product, descending-price clock format

- Each round has specified start and end times
- For each product, the price for the next round is announced (“announced price”) – price falls round to round
- Round opens and each bidder submits the number of tranches of each product it is willing to supply at the product’s announced price
- Round closes
 - **If the total number of tranches bid > tranche target for any product**, then announced price for that product will be reduced for the next round by a price decrement (typically 0.5% to 5%)
 - **If the total number of tranches bid \leq tranche target for any product**, then the announced price for that product will remain unchanged for the next round
- Round results are reported prior to the start of next round

Bidding Format

Bidder's Eligibility

Bidder's eligibility

- This is the maximum number of tranches the bidder can bid in a round
- Bidder's eligibility for a round is the total number of tranches the bidder bid in the preceding round
- Thus, bidder's eligibility cannot increase during auction – only stays the same or declines

Bidding Format

Reservation Price and Starting Price

There is a reservation price for each product

- No tranche will be procured at a price that is above the reservation price for the product
- The reservation price will not be disclosed to bidders

Starting price for each product = announced price for round 1

- Announced no later than three (3) business days before bidding starts
- No lower than the product's minimum starting price; no higher than its maximum starting price
- Starting price \geq reservation price

Bidding Format

Default Bid

Default bid for a bidder:

If bidder entered round with positive eligibility but fails to submit a confirmed bid in the round, then a default bid will be submitted on behalf of the bidder

- Products for which the announced price decreased from the preceding round – the default bid will equal zero (0) tranches
- Products for which the announced price did not decrease from the preceding round – the default bid will equal the accepted number of tranches from the preceding round

A bidder with zero (0) tranches across all products will not be able to submit any more bids in the auction

Bidding Format

Subscription State = Measurement of Excess Supply

At the end of each round, a product is over-subscribed (excess supply > 0), subscribed (excess supply = 0), or under-subscribed (excess supply < 0)

Excess supply = # of tranches bid – tranche target

- 1) If excess supply > 0:** Price for the product is reduced by a price decrement and the auction will continue with the next round.
- 2) If excess supply = 0:** Price for the product will remain unchanged. Bidders who bid on the product will not be able to reduce their tranches bid on the product in the next round of the auction.
- 3) If excess supply < 0 and no bidders reduced the number of tranches they bid on the product:** Price for the product will remain unchanged. Bidders who bid on the product will not be able to reduce their tranches bid on the product in the next round of the auction.
- 4) If excess supply < 0 and one or more bidders reduced the number of tranches they bid on the product:** Consequences are the same as case #3, and also a rollback will be applied to the product.

Bidding Format

Discretion to Reduce Tranche Target

Discretion to reduce tranche targets (# tranches to procure)

- If there is insufficient supply bid for the tranches to ensure competitive bidding, Auction Manager may reduce the tranche targets
 - The criteria that could lead to such a reduction will be determined prior to the auction but will not be announced
 - Once certain pre-specified criteria related to excess supply and related to the reservation prices have been met, the discretion to reduce the tranche targets will be eliminated and there will be no reduction in the tranche targets
 - Any exercise of this discretion would be more likely in the earlier rounds of the auction
- If the Auction Manager reduces tranche targets for the auction, bidders will be informed of the revised tranche targets

Bidding Format

Rollback

When there is excess supply for a product at the end of round R, the announced price will decline for the round R+1

- In round R+1, bidders are free to reduce the tranches bid for the product either by switching tranches from the product to another product, and/or by reducing the total tranches bid across all products
- Products that were over-supplied in round R and that are under-supplied in round R+1 (excess supply < 0) are subject to a rollback following round R+1

The rollback process following round R+1 retains sufficient number of tranches that were bid on the product in round R such that excess supply for the product following round R+1 equals zero

- Tranches rolled back are selected at random from the tranches reduced or switched from round R to round R+1
- The price associated with rolled back tranches is the round R price (the price at which the tranches were bid) – i.e., a price higher than the round R+1 price
- Only tranches that were both bid on a product in round R and not bid on the product in round R+1 are subject to a possible rollback
- Even after a rollback, the total number of tranches accepted for a bidder across all products will be no greater than the total number of tranches the bidder bid in round R

Bidding Format

Illustrative Example of a Rollback – Single Product

Illustrative Bidding in an Auction (single-product example)							
Round	Tranche Target	Announced Price (\$/MWh)	Number of Tranches Bid				Total
			BidderA	BidderB	BidderC	BidderD	
1	100	\$75.00	34	55	21	72	182
2	100	\$70.00	30	55	15	50	150
3	100	\$66.00	20	52	10	45	127
4	100	\$62.00	15	48	0	44	107
5	100	\$59.50	0	48	—	42	90

The auction will conclude after round 5 because excess supply for the product was no longer positive. In the round, only 90 tranches of supply were bid against 100 tranches being procured. Negative excess supply triggers a rollback of 10 tranches.

BidderA bid 15 tranches at \$62.00/MWh in round 4 and 0 tranches at \$59.50/MWh in round 5. Because BidderA reduced its bid, it is subject to a rollback of up to 10 tranches.

BidderB bid 48 tranches in rounds 4 and 5. Because BidderB did not reduce, it is not subject to a rollback. BidderB wins 48 tranches at the clearing price.

BidderC bid 0 tranches at \$62.00/MWh in round 4 and is not subject to any rollback.

BidderD bid 44 tranches at \$62.00/MWh in round 4 and 42 tranches at \$59.50/MWh in round 5. BidderD is subject to a rollback of up to 2 tranches.

Rollback Results				
Round	Price (\$/MWh)	Tranches		
		BidderA	BidderB	BidderD
4	\$62.00	15	48	44
5	\$59.50	0	48	42
Rollback	\$62.00	9	0	1
Winning	\$62.00	9	48	43
Clearing price for all 100 tranches won = \$62.00				

Bidding Format

Winning Tranches, Bidders, and Prices

If Excess Supply = 0 for all products at end of a round

- Winning tranches are the tranches bid in the last round of the auction
- Winning bidders are the bidders who bid those tranches
- Uniform pricing: Price to be paid for winning tranches for a product will be the highest price for any tranche in the product's bid stack

If Excess Supply ≤ 0 for all products at the end of a round

- There will be a rollback for all products with excess supply < 0
- There will be no rollback for products with excess supply $= 0$
- Uniform pricing: Price to be paid for winning tranches for a product will be the highest price for any tranche in the product's bid stack

Note: In all cases, a product's bid stack has at most two prices

- If the bid stack has rolled-back tranches, then there are two prices in the bid stack – the most recent (i.e., lower) announced price and the next-most recent (i.e., higher) announced price
- If the bid stack does not have rolled-back tranches, then there is only one price in the bid stack – the most recent announced price

Bidding Format

Close of the Auction

Shortly after the last round of the auction, results are confirmed by the Auction Manager, then:

- Auction Manager provides to the FirstEnergy Ohio Utilities, the PUCO, and the PUCO advisor the identity of winning bidders, the number of tranches won by each winning bidder, and the prices for the tranches won
- Auction Manager notifies:
 - Each winning bidder of how many tranches the bidder has won and at what prices
 - Each unsuccessful bidder that the bidder has not won any tranches
- The PUCO will determine if there has been a violation of the CBP bidding rules in such a manner as to invalidate the auction based upon an assessment from CRA and the PUCO's advisor

FirstEnergy Ohio Utilities and winning bidders will execute the Master SSO Supply Agreement

Bidding Format

Contingency Plan

Contingency Plan of the FirstEnergy Ohio Utilities

- See Section 11 of the Bidding Rules
 - If fewer tranches than the tranche target are procured in the auction
 - If a winning bidder defaults prior to or during the SSO Delivery Period

Bidding Format

Technical Difficulties During the Auction

Unforeseen technical difficulties may happen during an online auction

Pursuant to the auction rules, if a technical difficulty occurs during the auction, depending on the circumstances the Auction Manager will:

- Inform all the bidders as soon as possible, by phone and/or Auction Manager Message page on the Bidding Website
- In case a bidder is unable to submit its bid via facsimile, it is recommended that the bidder call CRA's Help Desk to submit a bid over the phone
- The second option is to submit bids via email to the Auction Manager
- The final option is to submit bids using the Backup Bidding Fax Number
- Extend the duration of bidding round(s), extend the time between bidding round(s), or otherwise pause the auction

Timeline for Next CBP Auction

Timeline for June 2026 Auction	
Activity	Date
Webinar Information Session	Thursday, April 16, 2026
Part 1 Applications can be submitted	Friday, April 17, 2026
CRA announces tranche target and tranche size (% and MW)	Friday, April 17, 2026
Deadline to submit Part 1 Applications	Tuesday, May 5, 2026
CRA announces minimum and maximum starting prices	Tuesday, May 12, 2026
Part 2 Applications can be submitted	Tuesday, May 12, 2026
CRA announces any update to the tranche size (MW)	Thursday, May 21, 2026
Deadline to submit Part 2 Applications	Thursday, May 28, 2026
